Revised 6/4/2018

PERMIT DEPARTMENT

SOLAR PANELS - \$200.00

Permit Application Checklist:

- Layout of solar panels on actual designed roof with wind load & statement of structural integrity of roof with additional load & code references.
OR
Layout on a roof schematic with attached letter stating structural integrity of roof with additional load, wind load & code references.
- Include all attachment details for project.
- Solar Panel Specifications.
- All above stamped by Engineer
 - Note 1: Proof of Ground Fault protection indicated in the paperwork and/or in the field.
 - Note 2: If ground-mounted, a foundation plan will also be required and stamped by a Louisiana Licensed Engineer. An Elevation Certificate may also be required.
- Completed PERMIT APPLICATION
- Name & Physical Address of Job
- Copy of State of Louisiana Contractor's License
- Copy of Legal Contract

NOTE: If contractor is not going to do their own electrical, or is not qualified to do the electrical, then a licensed electrician will need to apply for a TRADE PERMIT for the job.
